

BRYCE A. ADDEO

1 Mayfair Court, Monroe Township, NJ 08831 ~ (732) 298-0084

bryce.addeo@gmail.com | www.linkedin.com/in/bryce-addeo | <https://bryceaddeo.github.io/>

Education

University of Florida, Gainesville, Florida

Bachelor of Science, Mechanical Engineering

Expected Graduation Date ~ May 2026

Current College GPA: 3.97

Experience

Finite Element Analysis Teaching Assistant—University of Florida

January 2026 – May 2026

- Hosted office hours twice a week and graded homework, exams and reports for a class of 76 students
- Created project report rubrics, sent out class announcements and proctored exams

Manufacturing Performance Engineer Intern—PIM Brands

June 2025 – August 2025

- Created a process flow for the Delkor packaging lines that showed the inputs, outputs and cycle times of all processes and identified areas of value-added time, non-value added time, and waste
- Tracked Overall Equipment Efficiency (OEE) of the Delkor packaging lines through Redzone software and captured the Human Machine Interface (HMI) settings during high performance
- Updated work instructions and trained operators on problem solving techniques that eliminated loss/waste
- Led a team of 8 interns on a project that planned the strategic approach and tactical execution of the Welch's Fruit Snacks 25th birthday celebration campaign
- Participated in Gemba walks that applied lean six sigma and continuous improvement methodologies

Design and Manufacturing Laboratory

September 2024 – December 2024

- Manufactured component parts to an oscillating, 2-stroke air engine using milling machines and manual lathes and tested assembled air engines with a compressed air source of 60 feet per second
- Completed industry standard documentation such as manufacturing inspection records and engineering change notices for the manufactured parts
- Designed a food slicer to attach to the air engine on SolidWorks accompanied by three design reports

Customer Sales Associate—General Nutrition Center (GNC)

April 2021 – April 2022

- Sold workout supplements, vitamins and other products to customers and carried out other shop operations
- Developed a product manual to assist in customer sales and communications

Miscellaneous Engineering Projects

- Led a group of 9 engineers to design and prototype a tether deployment system for connecting two 12U satellites to provide stable orbital mechanics and generate artificial gravity
- Completed two Finite Element Analysis (FEA) projects, including a Fully Stressed Design (FSD) study of a truss structure and a convergence analysis followed by a minimum mass optimization of a torque-arm
- Developed an AI machine learning model through a supercomputer to assist in sea turtle conservation
- Created reports for laboratory experiments based on mechanics of materials, controls and thermodynamics
- Completed three computing projects that studied static systems such as cantilever beams and 3D trusses as well as the internal forces and moments of the beams

Honors & Achievements

- Herbert Wertheim College of Engineering Dean's List all semesters with 14 or more credits taken
- Inducted into Tau Beta Pi, the oldest engineering honor society, for being top 1/8th in my class
- SOLIDWORKS CSWA certified (2023) (College)
- Recipient of the GMC Conference Student Athlete Award (2022) (High school)
- Recipient of the West Point Society Dwight D. Eisenhower Leadership Award (2021) (High school)

Skills

- Software skills: SolidWorks (CAD), Fusion (CAD), MATLAB, LabVIEW, Abaqus, Microsoft Office Suite
- Laboratory skills: bandsaw cutting, milling, manual lathing, tapping, sheet metal bending, stick welding
